V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. Statement**

Novelty (N)	Claims 1-9	YES
	Claims	NO
Inventive step (IS)	Claims 1-9	YES
	Claims	NO
Industrial applicability (IA)	Claims 1-9	YES
	Claims	NO

2. Citations and explanations (Rule 70.7)**NOVELTY (N) AND INVENTIVE STEP (IS)**

The invention defined by the amended claims is a paint roller cleaner which comprises two parts, the first part is an outer flange so that excess paint is scraped from the paint roller and the second part is a cylindrical housing which offers a very close fit to the inserted paint roller. A cleaning fluid is then applied to the housing in order to clean the paint roller.

No individual citation or obvious combination of citations disclose this arrangement.

The closest art is US 4386702A which discloses an annular ring which includes an external flange but does not disclose a cylindrical housing. Also US 4765354 A discloses a cylindrical housing but no external flange. It also does not mention that the paint roller is a close fit within the cylindrical housing.

Claims 1-9 therefore meet the criteria set forth in PCT Article 33(2) with regard to novelty and PCT Article 33(3) for inventive step.
